# The Decision Support Toolkit from inTEAM

EVERYTHING YOU NEED FOR HHFKA COMPLIANCE IN ONE SMART WEB TOOL

The Decision Support Toolkit is one critical tool with many uses for **State Agencies and School Districts.**

It's the Swiss army knife of compliance for the Healthy Hunger-Free Kids Act (HHFKA).

Production Records

Menu Planning

The requirements for HHFKA can be taxing on schools and districts, and with even more changes on the horizon, the time and effort required to meet the mandates will only increase. Be prepared for HHFKA today and into the future, with inTEAM.

inTEAM believes that proper menu planning is the core component for designing and operating successful child nutrition programs. To help with all the elements of and with

HHFKA compliance, our Decision Support Toolkit includes menu planning, cost management, production planning, and preparation/completion of a state administrative review. In addition, the inTEAM Learning Management System (LMS) allows you to utilize a combination of on-site training, remote training via webinar, self-guided training, and individual coaching with quizzes and reporting to verify staff comprehension. And, with inTEAM you have cloud-based 24/7 access and support, 365 days a year.

CASE STUDY

KDE Improves Processes with inTEAM

Kentucky's Department of Education (KDE) offers districts statewide a standardized approach to using HHFKA implementation funds utilizing inTEAM's suite of software tools. The results have been remarkable and have assisted KDE with accomplishing a number of key initiatives. State Agency staff completed training provided by inTEAM to train SFA's in implementing the software tools. Instructor-led training, in addition to wide utilization of inTEAM's learning management system, provided in-depth classroom and self-paced training to all KDE staff. Since initial implementation in 2012, over 4,000 menus have been created. Beginning in January 2014, the tools have been utilized to enter menu costs for more than 700 existing menus, 250 production records have been created, and administrative review supplements have been created in 41 out of 74 districts.

The implementation of inTEAM tools has resulted in improvements in KDE's processes, and increased efficiencies in staff utilization, while ensuring compliance with regulations. In addition, the continued use of eLearning allows KDE to monitor and document corrective action to ensure retention and application of skills learned.

As noted by Deanna Tackett, Director of KDE's Division of School and Community Nutrition, "inTEAM has been extremely customer-oriented and responsive...inTEAM's consultants have partnered with KDE to assist them with all stages of implementation of the tools purchased."
