

# 1 World Sync Call to Suppliers to Publish to the Nourish to Flourish Database

**RE: inTEAM & Nourish to Flourish (GLN 0860206001702)**

1WS has been at the forefront of partnering with-the K-12 Market in the utilization of GDSN® standards. We were an early advocate of the 2017 Nourish to Flourish (N2F) Initiative and the industry wide five-year effort leveraging GDSN to improve supply chain efficiency for all stakeholders. The result of this effort is a large consolidated single resource for K-12 operators. For the last three years we have also been working with USDA Foods for Schools and the Child Nutrition Database to assist them in migrating to GDSN.

The use of GDSN is now rapidly expanding. Region 10's Multi-Region Purchasing Cooperative (MRPC) is the latest to be “all in” in its support of GDSN for K-12 ([R10MRPC Press Release](#)), taking the entire industry a big step forward by reaching its 250+ K-12 Operators and the over 1 million students they serve.

As GDSN becomes more integrated into K-12, one of the biggest risks is that software companies will develop their own data silos, essentially defeating the purpose of the Nourish to Flourish initiative. To prevent this, inTEAM has offered to share the Nourish to Flourish database at no cost to any software application in need of access to this resource.

Publishing is simple. There is no charge to publish, and it can be accomplished with two simple steps:

1. Complete and submit this brief [K-12 Trading Partner Form](#).
2. Publish your all of your GTINs (product information) to **Nourish to Flourish GLN 0860206001702**.

If I have not reached the right person(s) to accomplish this request, kindly forward to the appropriate staff.

Please contact your 1 World Sync representative or Geri Hughes, N2F Project Manager at [geri@e-inteam.com](mailto:geri@e-inteam.com) for assistance in joining this important initiative.
